

### Security for gan By doubt call 112

- At arrival by the gan: look around to see the people, cars etc that nothing is suspicious.
- On the way to the building check around for anything suspicious.
- By entrance check the rooms for people or items.
- Check the classroom.
- Always check through the hole before opening the door. And close it right behind the parents.
- Never open the door for someone unknown.
- Look every once in a while out the window.
- Before going out with the children, one teacher should go before (if possible) and check that everything is fine.

## Vluchtplan

1. Avoid panic by **staying calm** yourself!  
ALWAYS USE YOUR COMMON SENCE!
2. If there is big danger make sure to get everybody out FIRST!
3. Call the alarm department: 112  
say what you need  
Brandweer/politie/ambulance  
voor “een Joodse Kinderopvang” :  
town : Den Haag,  
address: Spaarwaterstraat 200
4. If it is a small fire, try to stop it yourself:
  - to cover it with a wet cloth or cover/deksel.
  - To close the gas or electricity
  - Not to move the burning object (...)
  - close the door where the fire is
5. If you think that putting out the fire yourself is not possible:
  - make sure everybody leaves the room  
ATTENTIELIJST
  - check for this reason under the table or other hiding places
  - check the toilets
6. The teacher who finds the fire warns the others.
7. Use a special alarm signal to warn everybody:  
ER IS BRAND- KOM SNEL HIER

8. Leave the area in the opposite direction of the fire/danger:
  - fire/danger in front of the building:  
leave through backyard safety exit
  - fire/danger from back of the building:  
leave through safety exit to the street
  - fire/danger in corridor, or kitchen:  
leave through safety exit to the street
  - fire/danger in the hall: leave through front door
9. Only if **everybody is safe** you can think about trying to save other things, but do try to have a cell phone with you if possible.
10. after the evacuation everybody should meet and check on all the children on the street side (next to the PARKEERMETER) except if the danger is from there. Then the meeting point should be in the back of the building on the parking lot.
11. If using the BRANDSLANG always first open the HOOFDKRAAN before unrolling the SLANG.
12. If there is a lot of smoke, leave the area close to the floor, crawling with the head down as not to inhale too much smoke.
13. If by leaving a room the doorknob is very hot, don't open the door. The fire in the other area might be worse.
